If you are a lender, are you ready to improve your game? If you manage or review commercial relationships, what are the key drivers of borrower performance after the loan has been closed?

This advanced, two-day course has the answers, with a focus on effective initial structuring and subsequent monitoring of commercial lending relationships. It goes beyond the basics of financial analysis and portfolio management to provide experienced bankers the advanced tools to influence credit quality and profitability. We explore critical quantitative factors such as the role of sales growth in the financial performance of the borrower, as well as qualitative issues of industry, market and management risks.

Participants will learn how to improve their handling of a loan portfolio such that credit quality can be maintained along with producing new revenues for the bank. We’ll unlock the mysteries of loan agreements and covenants to improve monitoring of existing credits and enhance future underwriting and renewals. Other monitoring issues, such as interim financial statements, are covered. We finish with a set of unconventional problem loan warning signals to better assist lenders in getting an early jump on a potential weakness.

Richard Hamm has been training bankers for over 27 years, specializing in all phases of commercial lending and credit, including portfolio & risk management, commercial real estate & appraisals, plus selling & negotiating skills. His training work includes our top industry associations (the ABA & RMA), regional banking schools (Barret School of Banking - Memphis, Graduate School of Banking - Wisconsin, Southwestern Graduate School of Banking - Dallas, & Graduate School of Banking at Colorado), numerous statewide banking & community banking associations, plus individual banks.

On the consulting side, he has been involved in director training, loan policy formation, bank formation (start-ups & acquisitions) and related strategic planning. The RMA Journal has published over 20 articles by Hamm on various lending topics, and he has served for many years on its Editorial Advisory Board.

- Applying the concept of a firm's sustainable growth rate (compared to actual sales growth) and its effect on the financial condition and performance of a business
- Assessing industry, market and management risk and their effect on financial results and as part of an overall risk rating for the borrower
- Ongoing cash flow, working capital and leverage issues of commercial borrowers. For instance, how to calculate (from financial statements) the equipment and other capital expenditures, determine "maintenance capex" and how to get these lending opportunities that your bank is likely missing.
- Monitoring real estate: Tips and traps
- Managing commercial relationships to improve both credit quality and revenue opportunities
- Utilizing interim financial statements
- Issues with compiling a global cash flow or global analysis
- Negotiating, setting and monitoring loan covenants
- Recognizing (early) potential problem loans

Community bankers, small business lenders, private bankers, commercial lenders, loan review specialists, lending managers and credit officers.
