Breaking into Banking 101: Fundamentals of Commercial Banking - February 26, 2025 (Virtual)

Commercial banking can be intimidating because of its complexity and the risk oriented nature of the work. This course is a clear and thorough introduction to the key concepts, terminology, and processes involved in credit and lending. It doesn't assume much prior knowledge of the topic, so it's ideal for those in their first year in the industry. Learners will walk away with a clear understanding of their job and how their specific role fits into the bank's overall profitability goals. New credit analysts, lenders, and underwriters, as well as bankers who don't do credit analysis but need a working knowledge of the process. This may include statement spreaders, loan processors and closers, treasury management associates, administrative support for credit or lending officers, branch managers, and interns.

Advanced Credit Analyst School - February 13-14, 2025

This two-day course provides lenders and analysts with important tools beyond basic business financial ratios and credit analysis. Second, the non-financial issues faced by the business (industry, market and management risk) are discussed in relation to the ratios and cash flow results. Third, we introduce advanced tools that bring all of these concepts together: sustainable growth rate and break-even analysis. These tools lay the groundwork for developing assumptions to be used with computerized projection models. Finally, we discuss how to bring these issues into your written analysis of the credit.

Indiana Bankers Association (IBA) is pleased to sponsor the annual Community Bankers for Compliance Program (CBC). The CBC Program is the most successful and longest running compliance training program in the country. The CBC Program will provide your bank with up-to-date information on the ever-changing bank regulations, as well as guidance for structuring and maintaining your in-bank compliance program. In addition, it provides a forum where those responsible for regulatory compliance can discuss issues and exchange ideas with other community bankers.

Most community banks do not have the time or money to build elaborate compliance systems, but there is a solution. The CBC Program will provide practical, user-friendly compliance techniques and explain how they can be related to all areas of compliance. For example, setting up compliance files, developing training programs, responding to the examinations, and resolving disputes are among the areas that are reviewed.

Opening New Accounts Documentation and Compliance - March 13, 2025

Managing risk is the #1 priority for all financial institutions, starting at the new account desk. If a criminal cannot open a bank account, they cannot negotiate a stolen check, embezzle from their employer, or steal from your organization and community. Well-trained new account personnel and universal bankers who recognize and stop attempted fraudulent activity are the first lines of defense in protecting a financial institution from fraudsters. Trust and business accounts continue to grow in popularity and complexity - LLCs owned by Revocable Trusts and businesses owned by other businesses... the need for ongoing compliance training is paramount to maintain diligence and update processes and procedures. The session answers many of the complicated questions customers and employees ask. The 200+ page detailed manual, included in the registration and customized to Indiana State law, has become an invaluable resource for banks across the state.
